## SECTION- B (COMPOSITION)

8. Read the passage and answer the questions given below:

Water is essential for the survival of man. We can go without food for a long time but we cannot live without water even for a few days. The human body is 60 to 70 Percent water. Without water, we would be poisoned to death by the waste products of air. Kidneys flush out uric acid and urea with the help of water. Water is vital for the chemical reaction in the digestion metabolism. It carries nutrients and oxygen to the cells through blood and helps cool the body through perspiration.
By not drinking enough water, people may gain weight. Lack of water decreases the efficiency of the digestive and slackens the functioning of various organs. Proper water intake is the key to weight loss. If people who are trying to lose weight do not drink enough water, their bodies cannot metabolise fat.
The minimum water intake for a healthy person in a day is 30 ml per kg of the body weight. More water is needed if you exercise a lot in hot climate. When a person increases his water intake, in the beginning, he may have to visit the bathroom frequently. But with passage of time, his bladder adjusts itself and he urinates less frequently but in larger amounts. So, from today, start drinking more water than you usually consume.

On the basis of your reading of the passage, answer the following questions:
a. How does water cool the body?
b. What would happen to the human body without water? $\mathbf{2}$
c. What happens to a person when he increases his water intake?
9. Read the poem and answer the questions that follow:

## My Shadow

I have a little shadow that goes in and out with me, And what can be the use of him is more than I can see. He is very, very like me from the heels up to the head;
And I see him jump before me, when I jump into my bed.
The funniest thing about him is the way he likes to grow.
Not at all like proper children, which is always very slow;
For sometimes he shoots up taller like an India-rubber ball, And he sometimes gets so little that there's none of him at all.

Fill in the blanks and complete the summary of the poem:
5x1=5
The poet says that he has a little $\qquad$ that keeps following him wherever he goes. The shadow's appearance is just like the poet from the toes to the $\qquad$ . The poet says that his shadow does not grow like $\qquad$ . He says that his shadow grows like an $\qquad$ and sometimes he gets so $\qquad$ that there is none of him at all.
